# **Construction Begins on US Coast Guard Sector Headquarters @ CCIA**

With an official groundbreaking ceremony this morning, construction is officially underway on a new facility for the United States Coast Guard at Corpus Christi International Airport. The new sector headquarters will consist of nearly 170,000 square feet of hangar and office space and will be built on approximately 9.5 acres of land that is owned by the City of Corpus Christi. Once completed, the Coast Guard will have direct access to the runways at CCIA.

The interior of the USCG sector headquarters will include office and support space, mission critical command facilities, data centers, berthing areas for ready crews, and other amenities such as food service and a fitness center. The developer of the project, FD Stonewater, expects to complete the facility during the first quarter of 2015.
