EMERGENCY CONTINGENCY PLAN

TO COMPLY WITH 49 U.S.C § 42301(d)(2)
AS ADMINISTERED BY THE
U.S. DEPARTMENT OF TRANSPORTATION

Kevin Smith
Director of Aviation

CORPUS CHRISTI INTERNATIONAL AIRPORT
EMERGENCY CONTINGENCY PLAN

Corpus Christi International Airport has prepared this Emergency Contingency Plan pursuant to §42301 of the FAA Modernization and Reform Act of 2012. Questions regarding this plan can be directed to Alberto Bejarano at albertb@cctexas.com. Corpus Christi International Airport is filing this plan with the Department of Transportation because (1) it is a commercial airport or (2) this airport may be used by an air carrier described in USC § 42301(a)(1) for diversions.

This plan describes how, following excessive tarmac delays and to the extent practicable, Corpus Christi International Airport will:
- Provide and/or coordinate for the deplanement of passengers;
- Provide and/or coordinate for the sharing of facilities and make gates available at the airport; and
- Provide a sterile area following excessive tarmac delays for passengers who have not yet cleared United States Customs & Border Protection (CBP).

Corpus Christi International Airport has facility constraints that limit our ability to accommodate diverted flights or maintain the airport's safe operation and strongly encourages aircraft operators to contact the airport at 361-533-5820 for prior coordination of diverted flights, except in the case of a declared in-flight emergency. Specific facility constraints include the following:
- Limited aircraft boarding bridges;
- Limited remote aircraft parking positions; and
- Limited international arrival gate positions

Airport Information

Name of Airport: Corpus Christi International Airport (CRP)
Name and title of person preparing the plan: Alberto Bejarano, Operations Manager
Preparer contact number: (361) 826-1787
Preparer contact e-mail: albertb@cctexas.com
Date of submission of plan: 29 July 2022
Airport Category: Primary Non-Hub

Contact Information

In the event of diversion or other irregular operations events, aircraft operators should contact Airport Operations at (361) 533-5820 or (361) 826-1785 for assistance.

Plan to Provide for the Deplanement of Passengers Following Excessive Tarmac Delays

Corpus Christi International Airport does not own or operate any of the equipment needed to safely deplane passengers from air carrier aircraft and is, therefore, unable on its own to provide for the deplanement of passengers. Additionally, airport personnel are not trained to assist in the deplanement of passengers using equipment owned or operated by air carriers or contract service providers. We will provide a list of airlines, ground handlers, fixed base operators and

others who may have the necessary equipment and personnel to safely deplane passengers to airlines as soon as practicable after receiving requests from such airlines experiencing excessive tarmac delays at the contact number listed above.

Plan to Provide for the Sharing of Facilities and Make Gates Available in an Emergency

Corpus Christi International Airport has five gates with passenger boarding bridges two are common use and are controlled by the airport. The remaining gates at Corpus Christi International Airport are under preferential lease to air carriers and are not fully controlled by the airport during those time periods when the tenant's usage of that gate meets the usage specified in the preferential use lease. We may be able to direct a tenant airline to accommodate another air carrier aircraft at its preferentially leased gate during those time periods when the tenant airline is not using, or not scheduled to use, the gates. We will direct our tenant air carriers to make gates and other facilities available to an air carrier seeking to deplane at a gate during those time periods the gates are not in use or not scheduled to be in use, to the maximum extent practicable.

Plan to Provide a Sterile Area for Passengers Who Have Not Cleared United States Customs and Border Protection

Corpus Christi International Airport has defined sterile areas capable of accommodating limited numbers of international passengers. We will coordinate with local CBP officials to develop procedures that will allow international passengers who have not yet cleared United States Customs and Border Protection to be deplaned into these sterile areas to the extent practicable.

Public Access to the Emergency Contingency Plan

Corpus Christi International Airport will provide public access to its emergency contingency plan through one or more of the following means:
- Posting in a conspicuous location on the airport website (http://corpuschristiairport.com)
- Providing notice of the availability of the plan on the airport's social media accounts.
- Posting signs in conspicuous locations in the terminals.
- Advertising the availability of the plan in local newspapers of record.
